SUMMARY

- Highly motivated Software Developer specializing in AI/ML, with a focus on building scalable, real-time data solutions.
- Successfully delivered 3+ high-impact technical projects, showcasing proficiency in tailoring models for industrial data summarization and complex anomaly detection..
- Committed to writing clean, maintainable, and well-documented code following industry best practices; implemented automated deployment and reduced manual errors..

Education

• Bachelor of Technology: CSE (AI & ML) Presidency University, Bangalore	CGPA: 9.24 / 10.0 2021–2025
• Intermediate Krishna Murthy JR College	Percentage: 95.8 2019-2021
• Tenth(10th) Ravindra Bharathi High school	CGPA: 10 / 10 2018-2019

SKILLS

- **Languages** : Python , Java , SQL, R, Shell Scripting .
- **Cloud & Deployment**: : GCP, AWS , REST APIs, Git,
- **AI / ML**: Predictive Modeling, Prompt Engineering , OpenCV (Real-time), NLP, LLM, Generative AI.
- **Data & Analytics**: Pandas, NumPy, SQL Database Management, Power BI.
- **Tools**: Jupyter, VS Code, Eclipse , Power BI, Tableau, n8n (Workflow Automation).

PROJECTS

AgroDoc – Integrated Crop Protection Management

- Developed a microservices-based application using ML to provide **90%+ accurate crop forecasting** and pest detection for agricultural yield optimization.

Gesture Recognition for Human-Computer Interaction

- Created a deep learning model using **OpenCV and TensorFlow** achieving a **96% recognition accuracy** for complex hand gestures in real-time

AI-Based Smart Shopping Assistant

- Integrated a recommendation engine that improved user engagement by providing high-relevance product suggestions via a **robust REST API**.

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications**: IBM Data Science, Google Prompt Design (Vertex AI), Deloitte Data Analytics.
- **Contributions**: Active contributor to open Source projects and automation of product workflows.
